IMPORTANT SAFEGUARDS

Follow the basic safety precautions When using electrical appliances, basic safety precautions shall always be followed, to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Read all instructions.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against fire, electric shock and injury to persons, do not immerse power cord, plugs, or body of machine in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been damaged in any manner. Return appliance to the nearest authorized service facility for examination, repair or adjustment.
- The use of an accessory attachment not recommended by the appliance manufacturer may result in fire, electric shock, or injury to persons.
- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- To disconnect, turn any control to ‘OFF’ then remove plug from wall outlet.
- Do not use appliance for other than intended use.
- Use extreme caution when dispensing hot steam, hot water or hot coffee.
- For household use only.

SAVE THESE INSTRUCTIONS.
Pass them on to any subsequent user.
IMPORTANT SAFEGUARDS

Intended use

The appliance is designed and intended for household use only. It shall only be used for coffee preparation and to heat milk and water, according to these instructions. Use for any other purpose will be deemed improper. JURA Elektroapparate AG cannot accept any responsibility for the consequences of improper use.

People, including children, who
- do not have the physical, sensory or mental capabilities to use the appliance safely or
- are inexperienced or lack knowledge in how to use the appliance safely

must be supervised by a responsible person when using it, or must be instructed in how to use it correctly.

Special power cord set instructions

- The power cord is provided to reduce the risk resulting from becoming entangled in or tripping over a long cord.
- The cord shall be arranged so that it will not drape over the counter top or table top where it can be pulled on by children or tripped over.
- This appliance has a 3-pin grounded plug.
- Do not modify the plug in any way.

Do NOT use extension cords.

If the user chooses to use an extension cord,
- the marked electrical rating of the extension cord shall be at least as great as the electrical rating of the appliance, and
- if the appliance is of the grounded type, the extension cord shall be a grounding type 3-wire cord, and
- the longer cord shall be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over.

WARNING

To reduce the risk of fire or electric shock, DO NOT remove any service covers. DO NOT modify the appliance in any way that is not described in these instructions. NO user serviceable parts included. Repair MUST be done by authorized personnel only.

In the event of signs of damage, for example if there is a smell of burning, unplug the machine immediately from outlet and contact JURA customer service.
IMPORTANT SAFEGUARDS

\textbf{\textit{CAUTION}}

This appliance is for household use. Any servicing other than cleaning and user maintenance shall be performed by an authorized service representative:

- Do not immerse base in water or try to disassemble.
- Do not put the appliance or any individual parts in the dishwasher.
- Check voltage to be sure that the voltage indicated on the name plate complies with your voltage.
- Never use warm or hot water to fill the water container. Use cold water only.
- Keep your hands and the cord away from hot parts of the appliance during operation.

\textbf{\textit{NOTICE}}

- Never clean with scouring powders or hard implements.
- Ensure that the ventilation slots are not covered.
- Never pull out the drip tray during the brewing process. Only pull the drip tray when the display instructs you or when the appliance is ready for use.

\textbf{\textit{NEVER DO (or you will void your warranty protection):}}

- Never fill instant coffee, chocolate mix etc. into the bean container or ground coffee funnel (filler funnel for ground coffee). It will damage the functioning of the brewing chamber.
- Never fill sugar coated coffee beans into the bean container. In case of doubt, call your dealer.
- Never fill anything other than coffee beans into the bean container (no chocolate, no rice, no nuts, no spices, nothing other than roasted coffee beans).
- Never fill frozen beans into the bean container. If you store beans in the freezer, let them thaw 3 to 4 hours before filling them into the bean container.
- Never fill anything but fresh, cold and clean water into the water tank, except when decalcifying.
- Never use mineral or carbonated water. You can use tap water, bottled water, spring water and reverse osmosis water.
- Never do anything with the machine which is not described in these instructions. In case of doubt, call your dealer.

1 Preparing and using for the first time

JURA on the Internet

Visit us on the Internet.

On the JURA website (www.jura.com) you will find interesting and up-to-date information on your ENA and on every aspect of coffee.

3-colour plain text display

Your ENA features a 3-colour plain text display. The colours of the display texts have the following meanings:

- Green: The ENA is ready for use.
- Red: The ENA is prompting you to perform some action.
- Yellow: You are in programming mode.

Setting up the machine

When setting up your ENA, please note the following:

- Place the machine on a horizontal surface that is not sensitive to water.
- Choose a spot for your ENA which protects the machine against overheating. Ensure that the ventilation slots are not covered.

Filling the water tank

To enjoy the perfect cup of coffee we recommend changing the water every day.

NOTICE

Milk, sparkling mineral water or other liquids can damage the water tank or the machine.

- Only fill the water tank with fresh, cold water.

> Remove the water tank and rinse with cold water.

> Fill the water tank with fresh, cold water and reinsert it.

Filling the bean container

NOTICE

Coffee beans which have been treated with additives (e.g. sugar), ground coffee or freeze-dried coffee will damage the grinder.

- Only use roasted, untreated coffee beans to fill the bean container.

- Remove the bean container cover.
- Remove any dirt or foreign objects from inside the bean container.
- Fill the bean container with coffee beans.
- Close the bean container.

First-time use

The On/Off button also acts as a power switch. When the ENA is switched off, the machine does not consume standby energy.

WARNING

If the machine is operated with a defective power cord, there is a danger of potentially fatal electric shock.

- Never use a machine which is damaged.
- Never use a machine which has a defective power cord.
The water volume is given as standard in OZ. You can change this setting to ML in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Unit for amount of water’).

Precondition: The water tank and bean container are full.
- Insert the power supply plug into a power socket.
- Press the On/Off button to switch the machine on.

You can select another language by turning the Rotary Switch.
- Press the Rotary Switch to confirm the language setting.

OK, the language is set.
PRESS ROTARY
- Place a receptacle under the dual spout.

Inserting and activating the filter

Your ENA no longer has to be descaled if you are using the CLEARYL Blue filter cartridge.

Precondition: READY is displayed.
- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until FILTER – is displayed.
- Press the Rotary Switch to enter the program item.
- Turn the Rotary Switch until YES ✓ is displayed.
- Press the Rotary Switch to confirm the setting.
- OK

INSERT FILTER
- Remove and empty the water tank.
- Open the filter holder.
- Insert the filter cartridge into the water tank, exerting slight pressure.
- Close the filter holder. It will click into place audibly.

After three months, the filter will cease to work. You can check the elapsed time by referring to the date plate on the filter holder in the water tank.
- Fill the water tank with fresh, cold water and reinsert it.
- Place a receptacle (at least 17 oz or 500 ml) under the hot-water nozzle.
1 Preparing and using for the first time

- Press the Rotary Switch.
  OPEN TAP
- Turn the switch anticlockwise to position \( \downarrow \).
  FILTER RINSING, water flows out of the hot-water nozzle.

- You can interrupt rinsing of the filter at any time. To do this, turn the switch clockwise.
  Turn the switch anticlockwise to continue rinsing the filter.
- The water may be slightly discolored. This is not harmful to health and does not affect the taste.
  Rinsing of the filter stops automatically, CLOSE TAP.
- Turn the switch clockwise to position \( \uparrow \).
  HEATING
  READY
  The filter is now activated.

Determining and adjusting the water hardness

- If you are using the CLEARYL Blue filter cartridge and have activated it in programming mode, you will not be able to adjust the water hardness.

The harder the water is, the more frequently the ENA needs to be descaled. It is therefore important to adjust the water hardness.

The water hardness can be adjusted on a continuous scale between 1 °dH and 30 °dH.

<table>

<td>&gt; 14</td>
<td>&gt; 250</td>
<td>3</td>
</tr>
</tbody>
</table>
Determining the water hardness
You can find out what the water hardness is by using the Aquadur® test strip supplied as standard.
- Hold the test strip briefly (for one second) under running water.
- Shake off the water.
- Wait for about one minute.
- You will then be able to read the degree of water hardness from the discoloration of the Aquadur® test strip and the description on the packaging.

Adjusting the water hardness
Example: Change the water hardness setting from 16°dH to 25°dH.
Precondition: READY is displayed.
- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until HARDNESS is displayed.
- Press the Rotary Switch to enter the program item.
  16°dH
- Turn the Rotary Switch until 25°dH is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the water hardness is set.
  HARDNESS
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.
  READY

Adjusting the grinder
You can adjust the grinder on a continuous scale to suit the degree of roast of your coffee.

NOTICE
If you adjust the consistency of grind when the grinder is not operating, the grinding wheel could be damaged.
- Only adjust the consistency of grind when the grinder is running.

The consistency of grind setting is correct if the coffee flows regularly from the coffee spout. In addition a fine, thick crema forms.

Example: Change the consistency of grind during the preparation of a coffee.
- Place a cup under the dual spout.
- Press the Coffee button to start preparation.
- Turn the grinding wheel to the desired position while the grinder is running.

1 COFFEE, the preset amount of water flows into the cup and preparation stops automatically.
READY
2 Preparation

**WARNING**

Hot coffee, hot steam and hot water can cause scalding. Scalding is a serious burn.

- Use extreme care when handling hot liquid or steam.
- Allow liquid to cool down before drinking.
- In the event of scalding, rinse affected area with cold water and seek medical attention.
- Keep children AWAY.

For a summary of the different temperatures, please refer to Chapter 4 ‘Permanent settings in programming mode – Products’.

- You can interrupt preparation at any time while a specialty coffee or specialty coffee with milk is being prepared. Just press any button.
- Before and during the grinding operation you can select the coffee strength for ‘1 coffee’, ‘cappuccino’ and ‘latte macchiato’: MILD, NORMAL, STRONG.
- During preparation, you can change the preset amount of water by turning the Rotary Switch.
- You can follow the current status of preparation on the progress bar.
- The water volume is given as standard in OZ. You can change this setting to ML in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Unit for amount of water’).

You can make permanent settings for all products in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Products’).

### Coffee

**Precondition:** READY is displayed.

- Place a cup under the dual spout.

- Press the Coffee button to start preparation. 1 COFFEE, the preset amount of water flows into the cup. Preparation stops automatically. READY

**Preparing two specialty coffees at the touch of a button**

The preparation of 2 espressi and 2 coffees follows this same model.

**Example:** Prepare two espressi.

**Precondition:** READY is displayed.

- Place two espresso cups under the dual spout.

- Press the Aroma Boost button twice (within two seconds) to start preparation. 2 ESPRESSI, the preset amount of water flows into the cups. Preparation stops automatically. READY

### Aroma Boost

When you prepare an ‘Aroma Boost’ the maximum possible amount of powder is freshly ground and extracted to make an extra strong espresso or coffee.

**Precondition:** READY is displayed.

- Place a cup under the dual spout.

- Press the Aroma Boost button to start preparation. SPECIAL, the preset amount of water flows into the cup. Preparation stops automatically. READY

### Latte macchiato, cappuccino

Your ENA can prepare a latte macchiato or cappuccino at the touch of a button. There is no need to move the glass or cup.
Example: Proceed as follows to prepare one latte macchiato.

Precondition: READY is displayed.

- Place a glass under the dual spout.
- Remove the protective cover of the dual spout.
- Connect the milk pipe to the dual spout.
- Immerse the other end of the milk pipe in a receptacle with milk (figure: optional JURA 0.4 liter stainless steel vacuum milk container).

Ensure that the filling height of the milk is no higher than the milk pipe connection on the dual spout.

Press the Latte Macchiato button.
LATTE MAC., the milk foam is prepared. Preparation stops automatically when the preset amount of milk is reached.

There is a short interval while the hot milk separates from the milk foam. This allows the typical layers of a latte macchiato to form. You can choose the length of this interval in programming mode (see Chapter 4 ‘Permanent settings in programming mode – Products’).

LATTE MAC., coffee preparation starts. The preset amount of water flows into the cup. Preparation stops automatically.

Permanently setting the amount of water for the cup size

It is easy to make permanent settings for the amount of water for all specialty coffees according to the cup size. Adjust the amount once as shown in the following example. Every time you prepare a drink in the future, this amount of water will be dispensed.

Example: Permanently adjust the amount of water for one coffee to the cup size.

Precondition: READY is displayed.

- Place a cup under the dual spout.
- Press and hold the Coffee button.
  1 COFFEE, the grinding operation starts.
- Continue to hold the Coffee button down until ENOUGH COFFEE ? appears.
- Release the Coffee button.
  Preparation starts and the coffee flows into the cup.
  - Press any button as soon as there is sufficient coffee in the cup.
  OK, 1 COFFEE, the set amount of water for one coffee is permanently stored.
  READY

You can alter this setting at any time by repeating the above procedure.

Ground coffee

You can choose to use a second coffee variety, for example decaffeinated coffee, with the powder chute for ground coffee.

Never add more than two level measuring spoons of ground coffee.

Use ground coffee which is not ground too finely. Very fine coffee can block up the system so that the coffee only comes out in drips.

If you did not fill the machine with a sufficient amount of ground coffee, NOT ENOUGH POWDER is displayed and the ENA stops the operation.
3 Daily operation

The desired specialty coffee must be prepared within approximately one minute after filling with the ground coffee. Otherwise the ENA stops the operation and is once more ready for use.

The preparation of 1 coffee, 2 coffees, 2 espressi, cappuccino and latte macchiato with ground coffee follows this model. It is not possible to prepare an Aroma Boost with ground coffee.

Example: Prepare a cup of coffee using ground coffee.

Precondition: READY is displayed.

- Place a cup under the dual spout.
- Open the powder chute.
- Place one level measuring spoon of ground coffee into the filler funnel.
- Remove the filler funnel.
- Close the powder chute.
- Press the Coffee button to start preparation.

1 COFFEE, the preset amount of water flows into the cup. Preparation stops automatically.

It is also possible to prepare two cups of ground coffee. To do this, place two cups under the dual spout and add two level measuring spoons of ground coffee into the filler funnel. Press the Coffee button twice (within two seconds) to start preparation.

Hot water

⚠️ CAUTION
There is a danger of scalding from hot water splashes.
- Avoid direct contact with the skin.

Precondition: READY is displayed.

- Place a cup under the hot-water nozzle.
- Turn the switch anticlockwise to position WATER, hot water flows into the cup.
- Turn the switch clockwise when there is sufficient water in the cup. READY

3 Daily operation

Switching on the machine

When the ENA is switched on, a prompt to perform a rinse operation automatically appears.

- Press the On/Off button to switch the ENA on.
- Place a receptacle under the dual spout.
- Press the Rotary Switch to start the rinse. RINSING, the system rinses itself, stopping automatically. READY

Daily maintenance

To ensure that you get many years of reliable service out of your ENA and to guarantee the optimum coffee quality, the machine requires daily maintenance.

- Remove the drip tray.
- Empty the coffee grounds container and drip tray and rinse with warm water.
- Reinsert the coffee grounds container and the drip tray.
- Rinse the water tank with clean water.
Switching off the machine

When the ENA is switched off, the system is automatically rinsed if a specialty coffee has been prepared. If cappuccino or latte macchiato has been prepared, the cappuccino rinse also takes place.

- Place a receptacle under the dual spout.
- Press the On/Off button.

RINSING, CAPPuccino RINsING, the system rinses itself, stopping automatically. The ENA is switched off.

When the ENA is switched off with the On/Off button, the machine does **not consume standby energy**.

4 Permanent settings in programming mode

Products

In the program item **PRODUCT** you can make individual settings for all specialty coffees and milk specialties.

**WARNING**

Hot coffee, hot steam and hot water can cause scalding. Scalding is a serious burn.

- Use extreme care when handling hot liquid or steam.
- Allow liquid to cool down before drinking.
- In the event of scalding, rinse affected area with cold water and seek medical attention.
- Keep children AWAY.

You can make the following permanent settings for the **specialty coffees**:

- **Amount of water**: 0.5 OZ - 8.0 OZ (25 ml - 240ml) (per cup)
- **Coffee strength** (for 1 coffee): **MILD**, **NORMAL**, **STRONG**
- **Temperature**: **NORMAL**, **HIGH**

You can make the following permanent settings for **latte macchiato and cappuccino**:

- **Amount of milk foam**: 3 SEC - 120 SEC
- **Interval**: 0 SEC - 60 SEC
- **Coffee strength**: **MILD**, **NORMAL**, **STRONG**
- **Amount of water**: 0.5 OZ - 8.0 OZ (25 ml - 240ml)
- **Temperature**: **NORMAL**, **HIGH**

Permanent settings in programming mode always follow the same model.

**Example:** Permanently change the coffee strength (FLAVOUR) for 1 coffee from **NORMAL** to **STRONG**.

**Precondition:** READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until PRODUCT is displayed.
- Press the Rotary Switch to enter the program item.

**SELECT BUTTON**

Next select the button of the product for which you would like to make settings. No product is prepared at this point.

To change the setting for a double product, press the corresponding button twice within two seconds.

- Press the Coffee button.
  1 COFFEE WATER
- Turn the Rotary Switch until FLAVOUR is displayed.
Permanent settings in programming mode

- Press the Rotary Switch to enter the program item.
- Turn the Rotary Switch until STRONG is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the coffee strength is set.
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit the program item.
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.

Energy-saving mode

The ENA can be permanently set to an energy-saving mode (Energy Save Mode, E.S.M.©):

- **ENERGY —**
  - The ENA is constantly ready for use.
  - All specialty coffees as well as hot water can be prepared without having to wait.

- **ENERGY ▼**
  - Soon after the last preparation, the ENA stops heating up. As soon as the energy-saving temperature is reached, this is indicated in the display by the message ENERGY ON – this may last several minutes. The machine must heat back up before the next preparation.
  - Before coffee and hot water preparation, the machine heats up.

Example: Change the energy-saving mode from ENERGY — to ENERGY ▼.
Precondition: READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until ENERGY — is displayed.
- Press the Rotary Switch to enter the program item.
- Turn the Rotary Switch until ECONOMY ▼ is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the energy-saving mode is set.
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.

Automatic switch-off

By instructing your ENA to automatically switch itself off, you can cut down your energy consumption. If this function is activated, your ENA switches off automatically after the preset time following the last action on the machine.

The automatic switch-off can be set to between 15 minutes and 9 hours.

Example: Change the automatic switch-off time from 2 HRS to 1 HRS.
Precondition: READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until OFF AFTER is displayed.
- Press the Rotary Switch to enter the program item.
  2 HRS
- Turn the Rotary Switch until 1 HRS is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the automatic switch-off time is set.
  OFF AFTER
Rinses

In the program item RINSES you can make the following settings:

- INIT RINSE MANUAL
  The switch-on rinse must be started manually.
- INIT RINSE AUTOMATIC
  The switch-on rinse is started automatically.
- C-RINSE AFTER 10'
  You are prompted to perform a cappuccino rinse 10 minutes after preparation of a specialty coffee with milk.
- C-RINSE NOW
  You are prompted to perform a cappuccino rinse immediately after preparation of a specialty coffee with milk.

**Example:** Change the setting such that the cappuccino rinse is performed **immediately** after preparation of a specialty coffee with milk.

**Precondition:** READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until RINSES is displayed.
- Press the Rotary Switch to enter the program item.
- INIT RINSE
- Turn the Rotary Switch until C-RINSE is displayed.
- Press the Rotary Switch to enter the program item.
- AFTER 10'
- Turn the Rotary Switch until NOW is displayed.
- Press the Rotary Switch to confirm the setting.
  OK
  C-RINSE

**Unit for amount of water**

The water volume is given as standard in OZ. You can change this setting to ML in programming mode.

**Example:** Change the unit for the amount of water from OZ to ML.

**Precondition:** READY is displayed.

- Press and hold the Rotary Switch until RINSE appears.
- Turn the Rotary Switch until DISPLAY is displayed.
- Press the Rotary Switch to enter the program item.
- OZ
- Turn the Rotary Switch until ML is displayed.
- Press the Rotary Switch to confirm the setting.
  OK, the unit for the amount of water is set.
  DISPLAY
- Turn the Rotary Switch until EXIT is displayed.
- Press the Rotary Switch to exit programming mode.
  READY
Language

In this program item you can set the language used by your ENA.

Example: Change the language from ENGLISH to DEUTSCH.

Precondition: READY is displayed.

1. Press and hold the Rotary Switch until RINSE appears.
2. Turn the Rotary Switch until LANGUAGE is displayed.
3. Press the Rotary Switch to enter the program item.
4. Press the Rotary Switch to confirm the setting.
   OK, the language is set.
5. Turn the Rotary Switch until EXIT is displayed.
6. Press the Rotary Switch to exit programming mode.
   BEREIT

Your ENA has the following integrated maintenance programs:

- Cappuccino frother cleaning (C–CLEAN)
- Rinsing the machine (RINSE)
- Cappuccino rinse (C–RINSE)
- Cleaning the machine (CLEAN)
- Changing the filter (FILTER)
- Descaling the machine (DE–SCALE)

Rinsing the machine

You can initiate the rinse operation manually at any time.

Precondition: READY is displayed.

1. Place a receptacle under the dual spout.
2. Press and hold the Rotary Switch until RINSE appears.
3. Press the Rotary Switch to enter the program item.
4. Press the Rotary Switch to initiate the rinse operation.
   RINSING, the system rinses itself, stopping automatically.
   READY

Rinsing the milk system

After each milk preparation, the ENA prompts you to perform a cappuccino rinse.

Precondition: CAPPUCINO RINSE is displayed.

1. Place a receptacle under the dual spout.
Press the Rotary Switch to start the cappuccino rinse.

CAPPUCCINO RINSING, the milk system is rinsed.
The rinse stops automatically and READY appears on the display.

Cleaning the milk system

The dual spout should be cleaned **daily** if milk has been prepared to make sure it functions perfectly. Your ENA will not prompt you to clean the dual spout.

**WARNING**

Non-recommended cleaning agents will not optimally remove milk residues. This may cause the cappuccino frother to become blocked and fly off the machine. Discharge of hot steam.

- Use only original JURA milk system cleaner.

**WARNING**

Harmful and irritating cleaning agent. Harmful if swallowed. Irritating to eyes and skin.

- Keep children AWAY.
- Avoid contact with skin and eyes.
- After contact with skin, wash immediately with plenty of water. In case of skin irritation, seek medical advice.
- After eye contact, immediately flush eyes with plenty of water and seek medical advice.
- If swallowed, rinse mouth immediately and drink large quantities of water. Do not induce vomiting. Seek medical advice immediately and show label.

JURA milk system cleaner is available from specialized dealers.

**i** Press **and hold** the Rotary Switch until RINSE appears.

**i** Press the Rotary Switch to enter the program item.

C-CLEAN

Press the Rotary Switch to start cappuccino frother cleaning.

CLEANER FOR CAPPU.

- Remove the milk pipe from the receptacle with milk.
- Pour 8.5 oz (250 ml) of fresh water into a receptacle and add one capful of milk system cleaner.
- Immerse the milk pipe in the receptacle.
- Place another receptacle under the dual spout.

**WARNING**

If swallowed, rinse mouth immediately and drink large quantities of water. Do not induce vomiting. Seeking medical advice immediately and show label.

E JURA milk system cleaner is available from specialized dealers.

Dismantling and rinsing the dual spout

The dual spout should be dismantled and rinsed **daily** if milk has been prepared to make sure it functions perfectly. Your ENA will not prompt you to clean the dual spout.

- Remove the milk pipe and rinse thoroughly under running water.
Press the releasing devices and pull the dual spout down and off.

Push the milk system down and remove it.

Dismantle the milk system into its individual parts.

Rinse all parts under running water. If there are severely dried-on milk residues, firstly immerse the individual parts in a solution of 250 ml cold water and 1 capful of JURA milk system cleaner. Then rinse the parts thoroughly.

Fit the air intake pipe.

Reassemble the milk system, noting the numbering on the parts.

Insert the assembled individual parts into the dual spout and press them together.

Fit the dual spout on the machine. It will click into place audibly.

Changing the filter

- After 2000 oz (60 liters) of water have flowed through, the filter will cease to work. Your ENA will automatically prompt you to change the filter.
- After three months, the filter will cease to work. You can check the elapsed time by referring to the date plate on the filter holder in the water tank.
- If the CLEARYL Blue filter cartridge is not activated in programming mode, you will not be prompted to change the filter.

Precondition: FILTER / READY is displayed.

- Open the cover behind the Rotary Switch.
- Press the Maintenance button.
- Remove and empty the water tank.
- Open the filter holder and remove the old filter cartridge.
Insert a new filter cartridge into the water tank, exerting slight pressure.

Close the filter holder. It will click into place audibly.

Fill the water tank with fresh, cold water and reinsert it.

Place a receptacle (at least 17 oz or 500 ml) under the hot-water nozzle.

Press the Rotary Switch.

Turn the switch anticlockwise to position \( \downarrow \), FILTER RINSING, water flows out of the hot-water nozzle.

You can interrupt rinsing of the filter at any time. To do this, turn the switch clockwise.

Turn the switch anticlockwise to continue rinsing the filter.

The water may be slightly discolored. This is not harmful to health and does not affect the taste.

Rinsing of the filter stops automatically.

Turn the switch clockwise to position \( \uparrow \), HEATING READY.

Cleaning the machine

After 180 preparations or 80 switch-on rinses, the ENA will prompt you to clean it.

⚠️ WARNING
Non-recommended (e.g. liquid) cleaning agents may contain substances that could damage the machine or leave residues.

- Use only original JURA cleaning tablets. These are specially formulated for your machine.

⚠️ WARNING
Harmful and irritating cleaning agent. Harmful if swallowed. Irritating to eyes and skin.

- Keep children AWAY.
- Avoid contact with skin and eyes.
- Avoid generation of dust. Do not inhale dust.
- After contact with skin, wash immediately with plenty of water. In case of skin irritation, seek medical advice.
- After eye contact, immediately flush eyes with plenty of water and seek medical advice.
- If swallowed, rinse mouth immediately and drink large quantities of water. Do not induce vomiting. Seek medical advice immediately and show label.

The cleaning program lasts approximately 15 minutes.

Do not interrupt the cleaning program. The quality of cleaning will be impaired if you do so.

JURA cleaning tablets are available from specialized dealers.

Precondition: CLEAN / READY is displayed.

- Open the cover behind the Rotary Switch.
- Press the Maintenance button.
- Empty the drip tray and coffee grounds container and reinsert them.

PRESS ROTARY
5 Maintenance

- Place a receptacle under the dual spout.
- Press the Rotary Switch to start cleaning. **CLEANING**, water flows out of the dual spout. The operation is interrupted, **ADD TABLET**.
- Open the powder chute for ground coffee and drop in a JURA cleaning tablet.

- Close the powder chute for ground coffee. **PRESS ROTARY**
- Press the Rotary Switch. **CLEANING**, water flows out of the dual spout repeatedly. **EMPTY TRAY**
- Empty the drip tray and coffee grounds container and reinsert them. **HEATING READY**

**Descaling the machine**

The ENA builds up deposits of limescale over time and automatically prompts you to descale it when necessary. The degree of calcification depends on the hardness of your water.

**WARNING**

Non-recommended descaling agents (e.g. vinegar) may contain substances that could damage the machine or leave residues.

- Use only original JURA descaling tablets. These are specially formulated for your machine.

**WARNING**

Harmful and irritating descaling agent. Harmful if swallowed. Irritating to eyes and skin.

- Keep children AWAY.
- Avoid contact with skin and eyes.
- Avoid generation of dust. Do not inhale dust.
- After contact with skin, wash immediately with plenty of water. In case of skin irritation, seek medical advice.
- After eye contact, immediately flush eyes with plenty of water. Remove contact lenses. Seek medical advice.
- If swallowed, rinse mouth immediately and drink large quantities of water. Do not induce vomiting. Seek medical advice immediately and show label.

**NOTICE**

If the descaling operation is interrupted, there may be damage to the machine.

- Allow the descaling program to run to the end.

- **E** The descaling program lasts approximately 40 minutes.
- **E** JURA descaling tablets are available from specialized dealers.
- **E** If you use a CLEARYL Blue filter cartridge and this is activated, you will not be prompted to descale.
- **E** If the descaling agent comes into contact with sensitive surfaces (e.g. marble), damage cannot be ruled out. Clean up any splashes immediately.

**Precondition:** **DESCALE / READY** is displayed.

- Open the cover behind the Rotary Switch.
- **PRESS ROTARY**
- Press the Maintenance button. **EMPTY TRAY**
- Empty the drip tray and coffee grounds container and reinsert them. **AGENT IN TANK**
- Remove and empty the water tank.
Completely dissolve the contents of one blister (three JURA descaling tablets) in a receptacle holding 17 oz (500 ml) of water. This may take several minutes.

Pour the solution into the empty water tank and reinsert the tank.

Place one receptacle each under the hot-water nozzle and the dual spout.

Turn the switch anticlockwise to position \( \downarrow \). De-scaling, water flows out of the hot-water nozzle repeatedly.

Turn the switch clockwise to position \( \uparrow \). De-scaling, the descaling operation is continued. Water flows out of the dual spout repeatedly.

Empty the drip tray and coffee grounds container and reinsert them.

Empty both receptacles and place them back under the hot-water nozzle and the dual spout.

Remove the water tank, rinse thoroughly, fill with fresh, cold water and reinsert.

Turn the switch anticlockwise to position \( \downarrow \). De-scaling, water flows out of the hot-water nozzle. The operation is interrupted, close tap.

Turn the switch clockwise to position \( \uparrow \). De-scaling, the descaling operation is continued. Water flows out of the dual spout repeatedly.

Empty the drip tray and coffee grounds container and reinsert them.

If the descaling operation stops unexpectedly, rinse the water tank thoroughly.

**Descaling the water tank**

Limescale deposits may form in the water tank. To ensure correct function of the machine, descale the water tank from time to time.

- Remove the water tank.
- If you use a CLEARYL Blue filter cartridge, remove it.
- Descale the tank with a mild conventional descaling agent in accordance with the manufacturer's instructions.
- Rinse the water tank thoroughly.
- If you use a CLEARYL Blue filter cartridge, reinsert it.
- Fill the water tank with fresh, cold water and reinsert it.

**Cleaning the bean container**

Coffee beans may be covered with a slight oil film which remains on the walls of the bean container. These traces may negatively affect the coffee result. For this reason clean the bean container from time to time.

- Press the On/Off button to switch the machine off.
- Disconnect the power supply plug.
- Remove the bean container cover.
- Remove the coffee beans with a vacuum cleaner.
- Clean the bean container with a soft, dry cloth.
- Fill the bean container with fresh coffee beans, then close the bean container cover.

8 Transport and environmentally friendly disposal

Transport / Emptying the system

Keep the packaging for your ENA. It should be used to protect the machine during transport.

In order to protect the ENA from frost during transport, the system must be emptied.

Precondition: READY is displayed.
- Place a receptacle under the hot-water nozzle.
- Turn the switch anticlockwise to position WATER, hot water flows out of the hot-water nozzle.
- Remove and empty the water tank.
- Hot water will continue to flow until the system is empty.
- Turn the switch clockwise to position FILL WATER TANK.
- Press the On/Off button to switch the machine off.

The next time you use the machine the system must be refilled (see Chapter 1 ‘Preparing and using for the first time – First-time use’).

Disposal

Please dispose old machines in an environmentally neutral way.
